

QBOT COMPATIBILITY LIST

The current compatibility list for QBOT is shown below. In order for QBOT to work you will need a quilting frame, sewing machine and stitch regulator built in the machine or a Quilter's Cruise Control Stitch Regulator available. As we develop and test the adapter kit for the other quilting machines and frames, we will write the instructions and make QBOT available for these products. The development and test cycle for certain frames can be lengthy, so we ask for your patience as we expand QBOT's compatibilities.

Sewing Machines
Babylock Jewel Babylock QCP
Brother 1300/1500
Janome 1600P Janome 6600/6500/6400
